at the Faculty of Health,
Medicine and Life Sciences

Introducing Maastricht University and the Faculty of Health, Medicine and Life Sciences

At the Faculty of Health, Medicine and Life Sciences (FHML), everything revolves around life and health. The faculty offers six bachelor's programmes: Biomedical Sciences, European Public Health, Health Sciences, Medicine (Dutch and English track) and Regenerative Medicine and Technology. There is also a large number of specialised master's programmes.

Incoming exchange students that join FHML will have an unforgettable experience. Get inspired, make friends from around the world, choose from a comprehensive list of courses and experience Problem-Based Learning, a unique and active learning method. The student population at FHML is highly international and the exchange programmes are conducted entirely in English.

Faculty of Health, Medicine and Life Sciences

- Annually 160 incoming exchange students
- Nearly 130 exchange partnerships with universities and institutions
- Connected with 46 countries worldwide
- Part of the Maastricht University Medical Centre (MUMC+)
- Over 5100 students and 3000 staff, of which almost 30% come from abroad
- One of six faculties at Maastricht University
- Maastricht University is the most international university in the Netherlands, according to the Times Higher Education World University Rankings

Bachelor's programmes

European Public Health - fall and spring

Study public health and healthcare in Europe. This unique programme works on preventing disease and promoting health at the intersection of science, politics and law.

Incoming exchange students can register for a number of courses from the first, second and third year.

Health Sciences - spring

Combine biological, psychological, behavioral, environmental and health related factors. Health Sciences students work on complex healthcare and societal issues from a broad background.

Incoming exchange students can register for four different minor tracks: Biology and Health, Mental Health Sciences, Policy, Management and Evaluation of Health Care and Prevention and Health.

Biomedical Sciences - fall

Immerse yourself in how the body works and in medication and diseases. Biomedical Sciences explores the relationship between human beings and their environment: from molecules, to genes, to cells and organs, to individuals and to entire populations.

Incoming exchange students can register for a number of third year courses from the Biomedical Sciences programme.

Coming soon

We are currently developing minor courses in the bachelor Medicine and the bachelor Regenerative Medicine and Technology.

Master's programmes

For incoming master's students, we offer a number of courses in different programmes, such as: Biomedical Sciences, Governance and Leadership in European Public Health, Health Education and Promotion, Human Movement Sciences, Healthcare Policy, Innovation and Management and Epidemiology.

Internships, Clinical Electives or Research Electives are arranged on individual request.
