

General lab safety training:

- Start showing the emergency exit behind the T12 Nkl microscope
 - Fire extinguishers lab and outside the entrance
 - Shower above the entrance of the door to the ML-II room
 - Show first aid kit
 - Show eye shower at the sink
 - Explain the gasses in the lab: Natural gas at the lab table (it smells) and show the emergency brake
 - Show the other gas permits at the red gas box
 - Tell about the oxygen detectors and handling of the nitrogen tanks and the official nitrogen training.
 - Tell about the fire alarm (sensors above the doors)
 - For Last two items explain how to handle the alarms by calling +31 43 3875566
-
- Always wear glasses and a lab coat
 - No food, chewing gum and drinks in the lab
-
- Outside the lab tell about slow whoop in the hall
 - Explain the different kind of notification lights
 - Show the evacuation plan and where we have to assemble outside the building
 - In case you are pregnant, please inform your Armico immediately
