

## **GPA requirements for admission to business and economics pre-master programs at Maastricht University School of Business and Economics in AY2022-2023**

Students are requested to submit their academic transcript together with a diploma supplement explaining the grading system and scale applied in the country where the certificate was issued. Indications of acceptable GPAs from universities or universities of applied sciences outside The Netherlands can be found below. These examples are subject to change without prior notice. The Board of Admissions will ultimately decide whether a GPA is sufficient or not.

Please consider that only EEA certificates of University of Applied Sciences provide access to the pre-masters' programmes, while also non-EU certificates are accepted from scientific universities.

Austria: equal to, or lower than, 2,5 on a 5-point scale
