

Global Studies Experience Days 2022/2023

Task

You are working for an organisation whose job it is to make the global flow of tea more equitable and sustainable. Your first step is to analyse the stakeholders involved in this process, so that you can identify allies, opponents and strategies to meet your goal.

Work in a team of 4-5 to identify the stakeholders, understand their interests, and determine their level of power, legitimacy and urgency. The lecture will teach you how, and the worksheet serves to collect the data.
