

# Maastricht Clean up

## Event report

---

On Saturday, March 22nd, at 11 AM, the FPN Green Team recruited a group of 17 volunteers from various faculties from the university gathered at Griendpark for a trash pickup initiative. The cleanup focused on the riverside area of the park, as well as the space in front of the Complex stairs, where cigarette butts and beer lids were particularly abundant. Thanks to the collective effort, over 20 bags of trash were collected, and two bicycles were retrieved from the river. The weather was favorable, and the enthusiasm and kindness of the participants inspired plans for future cleanups.

---

After the event, volunteers enjoyed a well-deserved lunch with a "build your own lunch" station. Reflecting on the day, we noted a few improvements for next time, such as providing extra gloves and trash grabbers to accommodate more participants and make it easier to collect hard-to-reach litter. Based on the turnout and response, we are planning to organize another cleanup in Period 5, and we look forward to another successful event with even greater community involvement.

## Thank you

This initiative not only improved the cleanliness of Griendpark but also strengthened teamwork and environmental awareness among participants. We extend our gratitude to all who contributed!
