

**Maastricht Centre
for European Law**

MCEL Master Thesis project 2020 – 2021

Greening Europe

How does the EU want to become carbon neutral by 2050?

How can the “green oath: do no harm” be translated in law?

What role can EU fundamental rights law play in EU environmental law?

How does EU law stimulate sustainable investments?

How can the compliance deficit in EU environmental law be effectively addressed?

How do courts adjudicate in environmental, highly complex matters?

How does the EU try to ensure sustainability beyond its borders?

The Maastricht Centre for European Law invites highly motivated students to participate in this master thesis project on Greening Europe. Each student will carry out an individual research project on an EU environmental law topic; the questions above serve as inspiration, and we welcome other topics too.

Benefits: lectures | member of a research team | work in a project setting | get individual guidance | become an MCEL student member | and: contribute to a further understanding of how law can help to protect the European environment

Are you eager to write about one of these topics or other topics related to Greening Europe?

Please apply to be selected for this project and submit your application of maximum 750 words including your motivation and your proposed topic and/or research question, together with your short cv and grade lists (bachelor/ master, in case you already did a master) before the **28 October 2020 to: mcel@maastrichtuniversity.nl**
