

Welcome to Maastricht University

Two-year Master in Forensic Psychology

Prof. dr Corine de Ruiter

Forensic Psychology

Goals for this Master programme

- ✓ Training the next generation of scientist-practitioners for the forensic mental health field
- ✓ Creating an international student environment
- ✓ Theoretical knowledge and intensive skills training
- ✓ First year: core courses and skills labs
- ✓ Second year: clinical and research internships

Courses

- Psychology of Eyewitness Testimony
- Investigative Interviewing
- Experts and Their Decisions
- Psychotic Disorders
- Personality Disorders
- Professional Ethics
- Criminal Law
- Research Proposal Writing
- Faking Bad, Faking Good
- Forensic Neuropsychology
- Sex Offenders
- Young Offenders
- Psychopharmacology of Reward & Drugs of Abuse
- Applied Statistics for Forensic Psychologists

Example of a task in a course (1)

Consider the following scenario: You are walking the streets at night when all of a sudden, a man approaches you and threatens you with a gun. He demands money and credit cards, or else...

Questions:

- How well would you be able to describe the events?
- Would you be able to identify the perpetrator from a line-up?
- How do people “normally” react to such adversity?
- Would they suffer from posttraumatic stress disorder (PTSD), or are they somehow resilient to traumatic experiences?
- Is it a good idea to use psychological debriefing protocols?

Example of a task in a course (2)

Case I.

Seung-Hui Cho, the 23-year old student who killed 32 people on April 16, 2007 and then himself, left a long and "disturbing" note in his dorm room at Virginia Tech, say law enforcement sources. He also wrote at least two violent plays for an English course that worried his professor and several classmates. Sources described the note, which runs several pages, as beginning in the present tense and then shifting to the past. It contains rhetoric explaining Cho's actions and says, "You caused me to do this," the sources told ABC News.

Sources say Cho killed two people in a dorm room, returned to his own dorm room where he re-armed and left the note, then went to a classroom building on the other side of campus. There, he killed 30 more people in four classrooms before shooting himself in the head.

Witnesses say he was stone-faced as he opened fire.

Read:

Questions:

What symptoms does Cho reveal?

Could the massacre have been prevented?

If you think so, how? If you think not,

why not?

Skills Labs

- Forensic Assessment Skills I & II
- Therapy Skills
- Expert Witness Skills
- Forensic Assessment in Child Abuse & Child Custody Cases

Including

psychopathy assessment, risk assessment, criminal responsibility

schematherapy techniques

how to write a forensic report, mock trial

child custody evaluation, work product review

 Go
the **extra**
mile

Second year

Clinical Internship

minimum 520 hours in a forensic-clinical setting

Option of obtaining BAPD ('Basis Aantekening Psychodiagnostiek') and GZ-verklaring

Go
the
mile
extra

Research Internship

6 months

Either at UM or elsewhere

Master's thesis

Internship placements

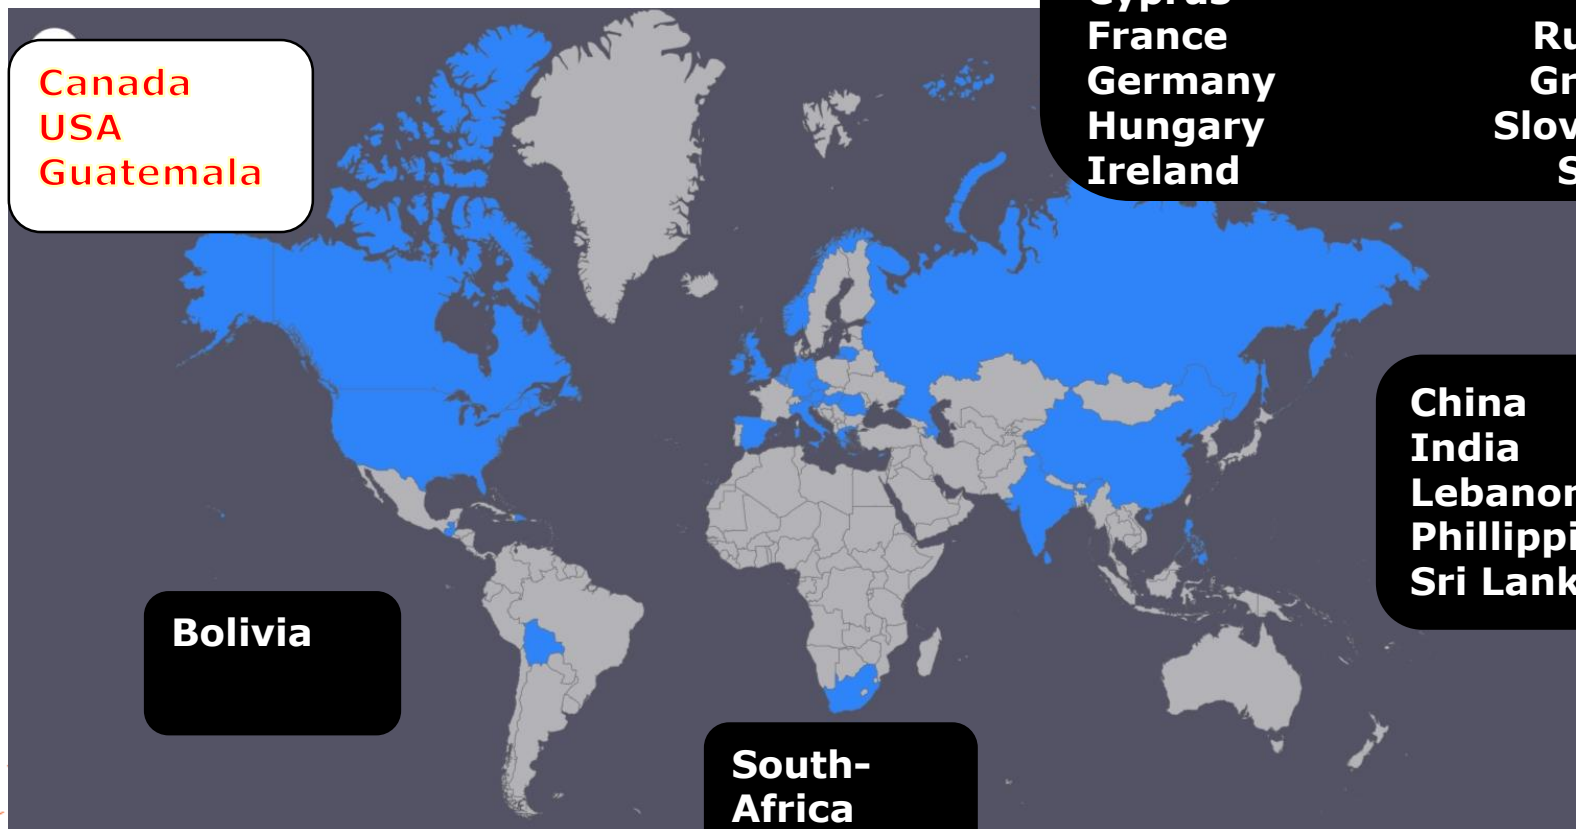

UM has agreements with clinical and research facilities in The Netherlands and abroad

Examples of internship placements:

- Edinburgh, Glasgow, Oxford, Liverpool, London, Berkshire (UK)
- Dublin (IRL)
- Toronto, Hamilton, Vancouver (CAN)
- Fordham University, Florida State University, City University NY (USA)
- Stockholm (SWE), Oslo (NOR)
- Berlin, Munich, Aachen, Düren, Hamburg, Regensburg (GER)
- Antwerp (BE)
- Amsterdam, Heerlen, Den Haag, Almere, Maastricht, Utrecht, Venray (NL)
- Sydney, Melbourne (AUS)

International Student Body (country of origin of admitted students)

Canada
USA
Guatemala

Bolivia

South-Africa

Austria
Azerbaijan
Bosnia
Denmark
Belgium
Czech Republic
Cyprus
France
Germany
Hungary
Ireland

Netherlands
Italy
Norway
Romania
Lithuania
UK
Russia
Greece
Slovenia
Spain

China
India
Lebanon
Phillippines
Sri Lanka

How to get in? (MAX 24 admissions per year)

- GPA of 7.0 (Bachelor's degree in Psychology or Mental Health Science or University College)
- Motivation letter
- Reference letters (2)
- Forensic experience/course work is a plus
- English language proficiency
- Interview (in person or via Skype)

Deadline for admissions: Final: 31 March 2019

Tuition fee 2018-2019 (NL/EU citizens): € 3.720

And then, after this master?

- Further education, e.g., PhD programme

- Start clinical work in the forensic field, e.g.,
 - Forensic psychiatric hospital / forensic outpatient clinic
 - Addictions treatment facility
 - Prison
 - Juvenile Justice Institutions
 - Child protection services
 - Women's shelter/ Victims' advocacy
 - Policy advisor

- Further professional training as GZ-psychologist (NL), psychotherapist, etc.

Rankings
