UM4U App

AppChallenge@UM
19 en 20 april

Maastricht University

Screenshot 1	Screenshot 2	Info about app

The App is made to connect with students outside the classroom. For them to ask question directly to their tutor and excel in subjects before tutorial meetings. We have also changed the way people use UMCards, by modifying the MiFare network and have it projected throughout the nfc chip behind our smartphones to always allow students to have access to university faculties even without their passwords.
