Chapter III Aim, content and structure of the Bachelor's study programmes

Article 3.1 Learning goals

The content of the SBE Bachelor's study programmes have an international orientation and focus. The learning goals of the Bachelor's study programmes of the SBE at Maastricht University are that graduates have:

- Knowledge and insight (Our graduates are able to understand and use academic knowledge in a self-directed manner) and
- Academic Attitude (our graduates have developed an academic attitude)

The following two learning goals, which explicitly imply an international focus, apply explicitly to the programmes:

- Global Citizenship (our graduates are aware of their responsibility in a global, ethical, and social context) and
- Interpersonal Competences (our graduates are able to demonstrate excellent interpersonal competences in an international professional setting).

These four learning goals are characteristic for all SBE Bachelor's study programmes. They are translated into programme specific learning objectives, which are offered and measured in obligatory as well as elective courses of the programme. The specific learning objectives can be found on the UM website.

Article 3.2 Form of the study programmes

All Bachelor's study programmes at the SBE are offered as full-time study programmes and start once a year in September. Each Bachelor's study programme lasts three (3) academic years with a workload of 1,680 hours per academic year, which corresponds with 60 ECTS credits per academic year. One ECTS credit equals a workload of 28 hours (Article 7.4 The act/WHW).

Article 3.3 Language

1. The Bachelor's study programmes and pre-masters, language of instruction, teaching and examinations are conducted and given in English, with the exception of the Bachelor's study programme Fiscal Economics, for which the education and examinations are partly given in English and partly in Dutch.
2. Components of an educational unit may be in Dutch or in another common language in the European Union (EU). Dutch, English, French and/or German texts may be used in the education and examinations.
3. The choice for the language of instruction of the programmes is in line with the UM Code of Conduct on language in accordance with the Dutch Higher Education and Research Act (WHW) Article. 7.2. For justification on the choice of the language of instruction, please see appendix VII of this BSc-EER.

Article 3.4 Communication

1. The SBE (may) use(s) (digital) communication channels (such as My UM, the UM webmail account, Canvas, the Student Portal, My SBE Intranet and/or other UM/SBE channels) to inform students of or to communicate about the study programmes, exam(ination)s, (to announce) decisions and/or other topics related to the UM or SBE.
2. Students must regularly check the (digital) communication channels, mentioned under 1 of Article 3.4 of this BSc-EER, throughout the entire academic year. It is the students' own responsibility to inform themselves by checking these channels. Information disseminated via the (digital) communication channels is assumed to be known.

Chapter IV Education and Examination

Article 4.1 Registration for Educational Units and Examinations

1. Students are informed on the registration deadlines and the procedure they must obey in order to have a correct and timely registration for educational units and examinations, amongst others by publication on the Student Portal and MySBE Intranet. It is the students' own responsibility to check in time whether they have a valid registration.
2. As an exception, first-year Bachelor's students will be automatically registered by the scheduling office for all first-years Bachelor's educational units, examinations and resits. Furthermore, pre-master's students will be automatically registered by the scheduling office for all educational units and examinations of the first year of enrolment in their pre-master, unless paragraph 4 of this article applies. In case Bachelor's and pre-master's students have resits beyond the first year of enrolment in the pre-master, they must register themselves correctly and timely for the resit, amongst others by publication on the Student Portal and MySBE Intranet.
3. Students are only allowed to participate in an educational unit when they are correctly and timely registered for it. In case a student has not registered correct or in time, participation will be refused by the course coordinator.
4. Students are only allowed to participate in an examination when they have a correct and timely registration for it. Upon registration for an educational unit, students are automatically registered for the first sit examination. In case a student was given a No Grade (NG) for the previous examination, the student must always register him/herself for the resit examination. In case of a fail or an insufficient grade for the first sit, the student is automatically registered for the resit examination within the same/current academic year. In case a student has no valid registration, results are invalid, unless the Board of Examiners decides to declare the result(s) valid.

Article 4.2 Prerequisites

In Bachelor's study programmes, participation in an educational unit and its examination may require students to have passed other educational units prior to registration for that particular educational unit, its examination or skills training. Prerequisites for educational units will be announced in the Outline Study Programme.

Article 4.3 Rules of procedure for examinations

1. In the rules of procedure for examinations, which can be found on the Student Portal and MySBE Intranet and attached to these BSc-EER, the Board of Examiners lays down the rules and guidelines regarding proper conduct with regard to examination and regarding the procedural aspects of examination, including non-compliance with these rules.
2. If students are suspected to have violated the rules of procedure for examinations in an examination or part(s) thereof, the Board of Examiners will investigate and decides whether fraud is established and if so, which sanction will be imposed in line with Chapter XI of this BSc-EER.
3. If there is a suspicion of an irregularity/irregularities before, during or after an examination, the Board of Examiners will investigate whether this has led to an omission in the chain of custody. If so, the Board of Examiners can declare the examination invalid or may impose (a) sanction(s) in line with article 4.11 and article 9.2, paragraph 4, of this BSc-EER.

Article 4.4 Assessment

1. Examinations will be conducted, assessed and graded by examiners appointed by the Board of Examiners.

Article 4.5 Written examinations

For every written examination, an assessment norm is determined and stated on the examination paper. Written examinations also include taking these examinations by computer/digitally. The Board of Examiners may draw up guidelines for formulating written assignments, which will be published on MySBE Intranet.

1. There are six (6) examination periods in each academic year: one (1) at the end of each course period.
2. Examinations can be conducted during the educational units, in the examination period at the end of an educational unit in which the educational unit to be examined was taught, and during the organised resit weeks, as stated on the academic calendar published on MySBE Intranet and in the syllabus of the educational unit concerned.
3. In case the Board of Examiners granted a student an extra examination opportunity (see article 4.13), the examination can also be conducted outside the examination periods as mentioned in paragraph 2 of this article.

Article 4.7 Location of the examination

In order to safeguard the quality of examinations, written examinations, not being online examinations, can only be held at the SBE location(s) as published on MySBE Intranet or at a location approved by the Board of Examiners. Unless communicated otherwise by the Board of Examiners on MySBE Intranet, no written examinations will be offered at a location that is not defined as an SBE location on MySBE Intranet, such as examinations in foreign countries, except for examinations taken by outgoing students belonging to the study abroad requirement.

Article 4.8 Oral examinations

1. The Board of Examiners may decide that oral examinations are open to public. For every oral examination an assessment norm is determined and made available by the examiner within a reasonable period before the examination takes place. An oral examination is given by an examiner in the presence of an assessor (second examiner) and taken by one student at a time, unless the Board of Examiners has decided otherwise.
2. An oral examination will be assessed and graded by one examiner appointed by the Board of Examiners and a second assessor. The examiner must provide the student with a written statement of this assessment stating the grade.

Article 4.9 Attendance, Participation and course assignments

After (component(s) of) an examination has/have been declared invalid, the Board of Examiners must inform the student(s) on the consequences and, if applicable, on another opportunity to take (components of the) a new examination.

Article 4.12 Resits

1. A resit of an examination entails the second opportunity within an academic year for students to take an examination facilitated for all educational units or components thereof, unless explicitly excluded in the syllabus.
2. The exclusion of a resit opportunity for (a) component(s) of (the examination of) an educational unit is only permitted if the aforementioned component(s), because of its/their nature can only be assessed within the relevant course period (e.g. participation, software labs, presentation).
3. The syllabus may stipulate (additional) rules with regard to the resit and for components of the educational unit, which are also considered to be resits. Consequently, the form of the resit of an educational unit or of the components may differ from the form used for the first sit examination(s).
4. The highest overall final grade obtained will be considered the final grade for the educational unit.
5. It is not allowed to take a resit for an educational unit that is already awarded with a pass or a grade of five and a half (5.5) or higher and the student obtained the ECTS credits for the educational unit.

Article 4.13 Extra Examination Opportunity

More information (on the possibilities) can be found on the UM website.

Article 4.16 Results

All examinations in the SBE Bachelor's study programmes and premasters are assessed by means of a whole or a half grade on a scale from 0.0 to 10.0 or qualified as a pass/fail in accordance with this Article. Grades are given on a scale from 0.0 to 10.0 in whole grades, half grades or a pass/fail or a No grade (NG). A grade as from a 5.5 is considered sufficient. The grading scale from 0.0 to 10.0, as applied by the SBE, is to be interpreted as indicated below. **Disclaimer:** Rights can only be derived from final results as published in the Student Portal, note that the explanation of the marks in the table below is only used to explain the valuation of the mark and is not a grading in itself (e.g. if an examiner indicates "Good" for an examination, this does not automatically mean the examination is graded with an 8.0. Vice versa the grade 8.0 is defined as a "Good" result).

10.0	Outstanding
9.0	Very good
8.0	Good
7.0	More than satisfactory
6.0	Satisfactory
5.5	Pass

See also Article 4.16 Results.

Article 4.21 Validity

1. In principle, the positive final (overall) results for passed educational units and exemptions, registered in the Student Portal, are valid for an unlimited period, unless the student's knowledge, insight or the skills that were examined are demonstrably outdated. With regard to the latter, the SBE Board may decide whether results are demonstrably outdated and can limit the validity of results and may require (an) additional(s) or alternative examination(s).
2. Partial results (components) of a Bachelor's first-year's educational unit which were passed will remain valid in the academic year in which the partial results are obtained

and two (2) more academic years, without prejudice to the competency of the Board of Examiners to extend this period of validity.

- 3a. Passed partial requirements (components) of an educational unit, not being (a) first-year's Bachelor's requirement(s), will remain valid in the academic year in which the partial results are obtained and two (2) more academic years, unless the student reregisters himself for and participates in the entire educational unit again (restriction). Participation in this context means that the student has attended one or more tutorials of the educational unit in another academic year than during the participation was passed in the first place.
- 3b. The syllabus may deviate from the aforementioned restriction, under 3a of Article 4.21 paragraph 2, by stating that passed partial requirements (components) of the educational remain valid even if a student re-registers for and participates in the educational unit again.

Fraud includes but is not limited to a student:

 - having communicated or tried to communicate with fellow students, either verbally or through gesture, without permission from an exam supervisor, examiner, or a member of the Board of Examiners;

Plagiarism includes but is not limited to a student:

3. If fraud has been established and, if applicable, a sanction has been imposed, the Board of Examiners will include the decision in the student's file. The decision can be

taken into account in any future event of this nature and this might lead to a more severe sanction.

Chapter XVIII Honours programme and MARBLE

Article 18.1 Honours programme

1. SBE Bachelor's students have the opportunity to do the Honours programme. Students who want to participate in the Honours programme have to apply at the end of the first year to be admitted. Only a limited number of students will be accepted. The selection procedure is published on MySBE Intranet.
2. Participating in the Honours programme means that students must do the MARBLE programme within the regular Bachelor's study programme (see Article 18.2) and in addition will need to obtain 30.0 extracurricular ECTS credits.
3. Students who successfully complete the Honours programme receive an Honours programme certificate and a MARBLE certificate together with the Graduation documents of the regular Bachelor's study programme if they also have fulfilled all graduation requirements of the Bachelor's study programme concerned.
4. The Honours programme (i.e. all educational units successfully completed within the Honours programme and that are part of the Honours programme), will not be mentioned on the curricular transcript of the Bachelor's study programme. Those educational units will only be stated on the extracurricular transcript. The credits obtained that are part of the Honours programme do not count towards a student's GPA of the regular Bachelor's study programme.

Article 18.2 MARBLE (Maastricht Research Based Learning)

1. Research Based Learning offers students in the third year of their Bachelor's study programme the opportunity to focus on research in the form of a MARBLE project of in total 14.5 ECTS credits.
2. This MARBLE project includes the MARBLE research course of 6.5 ECTS credits, and one (1) MARBLE Bachelor's thesis of 8.0 ECTS credits.
3. Students have to apply for participation in this project. Coordinators of the MARBLE projects decide on admission, except for students who do the Honours programme.
4. Project descriptions and guidelines including the selection procedure are published on MySBE Intranet. The MARBLE credits constitute part of the study load referred to in Article 16. Therefore, the MARBLE credits will substitute part of the regular 3rd year components. Honours students are automatically eligible.
5. Students who successfully complete the MARBLE programme receive a MARBLE certificate together with the Graduation documents of the regular Bachelor's study programme if they also have fulfilled all graduation requirements of the Bachelor's study programme concerned.
6. The educational units and results obtained within the MARBLE project, will be listed on the (final) curricular transcript of the Bachelor's study programme and count towards the student's GPA.

Chapter XIX Open Programme

Article 19 Open Programme Bachelor's study programmes

1. Deviation from the regular Bachelor's study programmes as provided in this article and further detailed in article 16 will result in a switch from the specific Bachelor's study programme to the Bachelor's Open programme.
2. A Bachelor's Open Programme represents a total study load of 180.0 ECTS credits.
3. An Open Programme consists of the obligatory first-year Bachelor's exam and a subsequent final Bachelor's exam with a coherent⁴ programme, built from sufficient educational units (120.0 ECTS credits) as required by the study programme. A student registered for one of the SBE Bachelor's study programmes may formulate a programme from programme components given by the SBE, upon approval of the Board of Examiners.
4. The Open programme needs to meet the objectives of the programme and terms of coherence. The Board of Examiners establishes and publishes the minimum requirements for an Open Programme on MySBE Intranet.
5. The Grade Point Average (GPA) of a Bachelor's exam (first-year's exam and final Bachelor's exam) equals the weighted average of all final numerical grades on the students' Bachelor's grade transcript. Although unsuccessfully completed educational units will not appear on the Final Bachelor's grade transcript belonging to the diploma, also unsuccessfully completed educational units of the Bachelor's exam that resulted in an insufficient final numerical grade, are calculated in the GPA. This also counts for educational units that do not belong to the approved open programme. Next to that, the assessment of a (Summa) Cum Laude classification is, amongst others (see Chapter XIV BSc-EER), based on all educational units on the grade transcript belonging to the study programme, including educational units that do not belong to your open programme/courses you substituted.
6. The Board of Examiners may decide that no specialisation will be mentioned on the student's (final) Bachelor's transcript if the proposed open programme deviates too much from the specialisation the student has chosen, making it impossible to meet the requirements of a/the specialisation. The Board of Examiners will inform the student of the aforementioned by email first and will ask whether the student would still like to have the proposed open programme.
7. What is stated in this Article, under paragraph 6, also applies to majors.

⁴ Coherent programme: one of the conditions of an open programme; the programme formulated by a student that deviates from the regular study programme, but is composed of educational units that are all together still sufficiently cohesive and supported by the Bachelor's programme director and approved the Board of Examiners. This programme must still meet the learning objectives of the programme concerned.

Part 4

Final Provisions

Chapter XXI Final Provisions

Article 21.1 Amendments

1. No amendments will be made that apply to the current academic year, unless the proposed amendments in all fairness do not affect the students' interests.
2. Amendments to these BSc-EER are laid down by a separate decision of the SBE Board and will be published on MySBE Intranet.
3. Amendments will not negatively affect a decision, towards a student, made under the existing regulations, by the Board of Examiners.

Article 21.2 Publication of the BSc-EER and other regulations

1. The SBE Board ensures the publication of the BSc-EER and other regulations and of all amendments to the BSc-EER.
2. Up-to-date digital versions of the regulations, rules and guidelines mentioned in section 1 of this Article will be made available on MySBE Intranet.

Article 21.3 Unforeseen circumstances

The Board of Examiners shall decide on cases that are not provided in these regulations. No rights can be derived from information provided by the SBE which is contradictory to the BSc-EER, unless the Board of Examiners explicitly decides otherwise.

Article 21.4 Hardship

1. The Board of Examiners is authorised to deviate from the BSc-EER in individual cases, if strict adherence to these regulations would result in inequitable circumstances for the student.
2. The Board of Examiners will take the personal circumstances as per Article 11.5, paragraph 2 of this BSc-EER into account when deciding.

Article 21.5 Force Majeure

If unforeseen and exceptional circumstances, occurred beyond the student's and/or UM's control and which are solely a result of force majeure; such as situations of crisis or war, humanitarian problems, geopolitical factors/tensions, the outbreak and control of contagious diseases (such as epidemics/pandemics), etc., hinder students from being able to fulfil (the) exam and/or other requirements stated in this BSc-EER, the Board of Examiners, the Faculty Board and/or the UM Executive Board may deviate from the BSc-EER and may decide to prescribe and/or provide (an) appropriate alternative(s).

Article 21.6 Unsuitability (Iudicium Abeundi)

1. In exceptional cases and after careful consideration of the interests involved, the Board of Examiners may, stating reasons, ask the Dean of the SBE to request that the Executive Board of the UM terminates or refuses the enrolment of a student in a programme if the student, through his behaviour or opinions ventured, has demonstrated his/her, unsuitability to practice one or more professions for which he is/will be trained by the programme he/she follows, or is unsuitable for the practical preparation for the (practice of the) profession. Examples of aforementioned inappropriate behaviour can be found in the SBE Code of Conduct, to be consulted via MySBE Intranet.
2. If the Dean of the SBE is asked by the Executive Board of the UM for a recommendation on a proposed termination or refusal of registration based on the reasons stated in

section 1, the Dean will in turn ask for a recommendation from the Board of Examiners. The recommendation to the Dean will be supported by reasons.

Appendices

Appendix I Transitional Regulations

Article 1 Applicability

1. Context

The Transitional Regulations apply to students who commenced their Bachelor's study programme in the academic year of the cohort corresponding with the chapter title of these Transitional Regulations.

These regulations remain in force for those students only, because the regulations are more favourable for those students.

They do not apply to students who commenced their Bachelor's study programme in a later academic year. Students are expected to find out about possible modifications and how these could affect them. Students may contact the Information Desk of the Education Office with any questions, or submit questions via Surfyourself (SYS).

2. Modifications

If modifications, which are to the detriment of the students, are made to the Education and Examination Regulations during the course of a programme, the Board of Examiners is required to provide an (interim) arrangement in order to prevent them from being disadvantaged.

However if a change is made to the regulations that is less favourable for students of an earlier cohort, the new regulations will apply to those students if they were published at least one year before the introduction of the new or changed regulations.

If compulsory courses or components in the education programmes will be cancelled, two resit examinations still have to be offered in the upcoming year. If elective courses are cancelled, then no examination or resit will be offered.

3. Subsidiary

Other than the substituted rule, all other rules of the above Bachelor Education and Examination Rules 2021-2022 remain fully applicable.

4. Interpretation of terms

The authority for the interpretation of terms in the first instance is carried by the Board of Examiners.

Appendix III Language of Instruction

In the Bachelor's study programmes, the language of instruction is English or another language.

The appropriateness of English or another language as language of instruction is determined by the international orientation of the programme in terms of its academic field of study and/or the fact that it prepares students for a specific field of activity or professional career in an international setting.

Bachelor's study programmes

BSc Business Analytics (BA)

BSc Econometrics and Operations Research (E&OR)

BSc Economics and Business Economics (EBE)

BSc Fiscal Economics (FE)

BSc International Business (IB)

The choice for the language of instruction of the programme is in line with the UM Code of Conduct on language in accordance with the Dutch Higher Education and Research Act (WHW) art. 7.2.

Because of the specific educational nature and profile of the programmes, teaching and examinations are conducted in English. This guarantees the quality of education, because:

a. The content of the programme has an international orientation and focus.

Besides the learning goals:

- (1) "knowledge and insight" (Our graduates are able to understand and use academic knowledge in a self-directed manner) and
- (2) "Academic Attitude" (Our graduates have developed an academic attitude), the following two learning goals, which explicitly imply an international focus, apply explicitly to the programmes:
- (3) "Global Citizenship" (Our graduates are aware of their responsibility in a global, ethical, and social context) and
- (4) "Interpersonal Competences" (Our graduates are able to demonstrate excellent interpersonal competences in an international professional setting).

These four learning goals are characteristic for all SBE Bachelor's study programmes. They are translated into programme specific programme objectives, which are offered and measured in obligatory as well as elective courses of the programme.

Specific for EBE, E&OR, IB and BA:

An obligatory part of the curriculum is a study abroad period or an international internship period, in which the student studies at one of our partner universities, located in Europe, South-Africa, Asia, Australia and North and South America or do an internship at a

company abroad, e.g. in emerging markets for the Emerging Markets specialisation within these programmes.

In line with the goals and content of the programme, all course material is based on international research and literature, which is in English.

b. The academic community is internationally oriented and the staff is international. Aligned with the learning goals and objectives an international classroom setting is a core element of the educational concept of the programme, where English is the common international language.

In order to make the concept work optimally, an internationally diverse student population as well as an internationally diverse group of teachers/staff, which are able to communicate in a common language (English), is indispensable.

c. The labour market demand is internationally oriented (English speaking) alumni. The graduates of the programme are well prepared to work in and with internationally oriented companies, such as the "big 4" consultancy companies, multinationals, banks, but also medium small enterprises, and national or international public institutions, in majority operating on international settings and in international markets.

Furthermore, graduates are well prepared to be accessible to connecting master programmes in English language.

d. The student intake and current population is internationally diverse and English is the common language: more than 50% are non-Dutch students.

In FE the majority is Dutch: Please note that during the programme all students take part in courses in which they meet and work with international SBE students as well as incoming exchange students. They experience the international classroom educational concept, which is characteristic and distinctive for all SBE programmes.

Specific for FE

The language of instruction is English because of the abovementioned reasons, however some curriculum components, including accompanying tests, may be offered in Dutch or another language because:

- the relevant curriculum component is specifically focussed on Dutch law,
- the relevant curriculum component is taught by Dutch lecturers
- it is deemed necessary for this curriculum component that students acquire speaking and writing skills in Dutch or another language.
