

Book package

Because Maastricht has a unique education system, you are not obligated to buy any books. However, some students have indicated that certain books are handy to have during the study.

That's why MSV Pulse put together a unique **basic book package** that you can use throughout your whole bachelor! This set has all the books we, the board of MSV Pulse, and older medical students think are necessary during your study. The set of books has been put together based on the different years; so all books are useful during the entire study.

You can buy this package at our web shop (www.msvpulse.nl > 'Verkoop' > 'Boeken' > 'Eerstejaars boekenpakket'). If you buy it between mid-August and mid-September, you get a discount. You need to be a member of Pulse to get this discount, though. You can sign up as a member at our web shop.

Other study materials

We also have a [web shop for other study materials](#), such as stethoscopes, reflex hammers, eye lights, dokter's coats, and more. Also with a discount.

Please note: delivery abroad is not possible, only at an address in the Netherlands. If you don't have an address here yet, you can get it delivered at the Pulse office where you can pick it up.

For more information or questions you can always send an email to msvpulse@maastrichtuniversity.nl or ask one of our board members at the faculty introduction when you pass by our stand or bar.
