

Training and Working with Simulated Patients for Teaching and Assessment

Simulated and standardized patients are involved widely in health education. This course is designed to teach participants to recruit, train, and supervise the performance of simulated patients for both teaching and assessment.

Programme information

In this course, we focus on developing an educational programme with simulated patients. Discussion topics include the development of working formats, writing cases and training simulated patients in both role-play and giving feedback.

Practical information

- **Date: 3 - 5 March, 2027**
- Registration deadline: 11 January, 2027
- Course fee: €2550,-
- Location: Maastricht

Staff

A multidisciplinary and international team of professionals in Health Education:
