### Internship

2014 Netherlands Court of Audit, The Hague (in Dutch: Algemene Rekenkamer)  
During my bachelor study, I completed a three-month internship at the Netherlands Court of Audit, specifically at the department of Defence, Foreign Affairs, and Development Aid. Most of my duties were tied to two projects. The first project was focused on the financing of the NATO, for which I collected publicly available information on the different flows of money to the NATO. The second project involved researching the public and private flows of money between the Netherlands and Afghanistan.

### Skills

- Excellent knowledge and experience with SPSS, Excel, and R
- Intermediate knowledge and experience with Stata
- Some knowledge and experience with (semi-)structured interviewing
